- IV. Reports –
 - A. LERT Report -
Summer activities included a workgroup where they prepared definitions for the learning outcomes and worked on putting together a survey to determine where the learning outcomes are being covered.

 - B. APGES Report –
They have met once to consider a request for a change of a course description, and the course is a 300 level course that is currently a Gen Ed course, but the newly adopted protocol does not generally support 300 level courses counting as gen ed. It was commented and is the general consensus of APGES and APC that if a current gen ed course requests changes, it opens itself up to being reviewed for it's gen ed status.
