

Attention Gamers!!!

Do you love video games?

Have you ever wanted to make one?

Well, here's your chance.

The Fox Valley Writing Project is hosting its fourth annual Young Writer's Game Design Academy. You will have the opportunity to work with other gamers to explore the exciting world of game design. You will use a variety of web based platforms, including Gamestar Mechanic to create your very own video games. The week long academy will focus on the design aspect of gaming and does not require a background in coding.

About the Academy

The Fox Valley Writing Project, an affiliate of the University of Wisconsin-Oshkosh, will be hosting two camps for students entering grades 5-8. No game design experience is necessary.

When: July 27-31 Monday—Friday

Academy 1 8:30-11:30 and Academy 2 12:30-3:30

11:30-12:30 Open lab time for both academies

Where: Horace Mann Middle School in Neenah, Wisconsin

Cost: \$125 This includes five, 3 hour sessions and four optional 1 hour open lab sessions, a daily snack, and a T-Shirt.

Why Game Design?

There is a growing national emphasis on Science, Technology, Engineering, and Math (STEM) learning. This academy will provide a collaborative environment for students to practice and improve these valuable skills. A Milwaukee middle school student was recently 1 out of 100 students invited to the National Science Fair in Washington D.C. for her video game created using the same program this academy uses.

Complete the application on the reverse side of this flyer to Register for the academy.
