

Come to a Math Colloquium!
Wednesday, November 28
4:10 – 5:10 in Swart 217

Number Talks

for Your High School and College Students

Focus on Numeracy and Mathematical Practices in Ten Minutes or Less

Jen Szydlik and Amy Parrott

$$\frac{5}{3} \quad \frac{5}{9} \quad \frac{8}{10} \quad \frac{1}{30}$$

Which one doesn't belong?

Want to help your students acquire numeracy and computational fluency?

Want to help them build connections between arithmetic and algebra?

Want to encourage classroom conversations about math?

Want to get your students *thinking*?

This interactive talk is designed for all of us who teach (or plan to teach) high school math, developmental math, or any math course for college freshmen. We will share ideas from the math education community that you can use right away to make a difference with your students.
