## 10. PROFESSIONALS

Professional titles include both those which require specialized certification, a specific degree or other specific professional credentials and related qualifications for entry into the series, and those that do not. (See UPG #1, Section 1.04(10), for a further explanation of the title group.)

Each title and accompanying definition were approved by the Board of Regents (12/06/91) and the Department of Employment Relations (12/23/91) unless otherwise noted.

### Professional Prefix Definitions

With the exception of Special Assistant, four prefixes are defined for all unclassified professional functions. Prefix levels for the Special Assistant function are assigned as a result of position evaluation ratings. Therefore, the professional prefix definitions do not apply to the Special Assistant titles. The first three professional prefix levels; Associate, No Prefix and Senior reflect successively greater experience, expertise and applied ability in a particular specialty area. As described below, these three prefix levels constitute a "natural career progression" track through which professional academic staff might be expected to progress in the area of specialty.

<u>Prefix</u>	<u>Professional Prefix Definition</u>
<b><u>Associate:</u></b>	At this level, a professional is expected to perform at the entry level of proficiency. This includes performing all or any of the basic duties and functions as defined for the specialty or by the level of certification or licensure.
<b><u>No Prefix:</u></b>	An individual at this level performs those duties and responsibilities expected of a fully competent professional. Typically, such duties and responsibilities require knowledge and skills gained only through considerable experience. A fully competent professional works independently in applying the approaches, methods and techniques of his or her profession and is active in developing or assisting in the development of new approaches to resolving problems.
<b><u>Senior:</u></b>	A professional at the Senior level performs program functions at a level of proficiency typically requiring extensive experience (e.g. a minimum of at least seven years of professional experience) and advanced knowledge and skills. At this level, the professional has a consistent record of exemplary performance. A Senior professional is expected to develop new approaches, methods or techniques to resolve problems with little or no expert guidance and to cope independently with new, unexpected or complex situations. At this level, a professional can be expected to guide or train other professionals or to oversee their work.

Although the typical professional academic staff member will show career advancement through the Associate, No Prefix and Senior prefix levels, Hayes/Hill Inc., saw "the need for a superstar category stressing peer recognition both within and outside the institution as one of the key criteria.

We would generally expect that a person in the superstar category would have at least ten or more years of progressively responsible experience in their field." Consistent with Hayes/Hill's original intent to reserve a prefix level "for the truly exceptional performers", the Distinguished prefix is defined below:

**Distinguished:** A professional at the Distinguished level performs at a level of proficiency typically requiring extensive experience and advanced knowledge and skills. The expertise of a professional at this level is commonly recognized by his or her peers and through a reputation which extends beyond his or her work unit. A Distinguished professional is expected to develop new approaches, methods or techniques to resolve problems with little or no expert guidance and to cope independently with new, unexpected or complex situations. At this level, a professional can be expected to guide or train other professionals or to oversee their work.

Unless an affirmative showing can be made that the appointee's study or research is primarily for his or her own benefit and is independent or self-directed, subject only to such supervision as might be given by a teacher to a student, research appointees with the Ph.D. should be given another appropriate title.

Such work should be contrasted with assigned duties under the direct supervision and control of the University, where the individual renders compensable services as does an employe.
