I. Overview

The locker rooms in the student recreation and wellness center will be reopened to meet the needs of students wanting to shower or change clothes before or after their workouts in the facility. This will be an expansion of the department’s offerings and vary based on campus alert levels. The goal is to have the locker rooms opened as described below by the end of the Fall 2020 semester.

II. Applicability:

The locker rooms will be available to any user of the SRWC during operational hours.

III. Procedure: Moderate Alert Protections in Place

A. Procedure/Process

1. Showers: All showers will be made available. Showers are individual showers divided by walls, and each shower has ventilation.

2. Locker Room Area:
   
   i. Men’s and Women’s: The area where lockers are located consists of three sub areas. The middle area will be taped off and remained closed, because this area is narrow, and its use may not meet the physical distancing requirements. The areas on each end will be opened because these are larger areas. One end will serve as the changing area for those using the showers. The other end will serve as the changing area for those not using showers.
   
   ii. Gender Neutral: This space will be opened in its entirety, save lockers as described below.

3. Lockers: Every sixth locker will be made available in the locker room areas that are opened. Lockers that are closed will be taped off so that they cannot be used.

B. Face Covering Requirements

1. Face Coverings are worn in all locker room areas except for when the locker room user is showering.

2. Student staff regularly conduct rounds throughout the facility to ensure compliance, so they will add the locker rooms to those rounds to ensure compliance in this space.

C. Physical Distancing Parameters
1. Capacity signs and Physical Distancing signs will be posted at the entrance of each locker room.
2. Lockers will be blocked off to ensure that a minimum of six feet physical distancing is met.

D. Hygiene
1. Student Recreation custodial staff will clean and disinfect the locker room area every morning prior to opening, and the custodial staff and student staff will spot clean and disinfect frequently touched surfaces throughout the day.
2. Student staff regularly clean and sanitize touchpoints throughout the facility to ensure disinfection, so they will add the locker rooms to their cleaning tasks to ensure sanitation in this space.

E. Disinfection
1. Custodial staff will disinfect the locker rooms with the Clorox 360 daily.
2. Sanitizing wipes will be made available in the locker rooms so that patrons can disinfect their own touchpoints

IV. Procedure Modifications: Very High Alert
   a. Locker Rooms will remain closed.

V. Procedure Modifications: High Alert
   a. Locker Rooms will remain closed.

VI. Procedure Modifications: Low Alert
   a. All lockers and locker room spaces will be opened without restriction and normal operating processes may resume.
