I. Overview
The Student Recreation and Wellness Center (SRWC) works to support the physical and mental well-being of UW Oshkosh students. In order to achieve those results, the following changes must be made to support the continued operation and use of equipment within the facility.

II. Applicability:
All users of the SRWC; this included students, faculty (with paid memberships), and staff (with paid memberships). No guests will be allowed into the SRWC until the Low Alert level is achieved.

III. Procedure: Moderate Alert Protections in Place
A. Procedure/Process
  1. Cardio equipment has been moved to the 3-court gym and other spaces to allow for proper distancing. When possible, equipment will be arranged so participants are not facing others who are exercising, decreasing the air exchange between users.
  2. Cardio and strength equipment will be positioned to allow for 10-12 feet between each piece of equipment.
  3. Weight equipment has been spaced at least 6 feet apart throughout the facility.
  4. The Multipurpose Access Court (MAC Gym) and Studio C/D will be utilized for Group Fitness Classes. Floor markings will be placed to ensure participants remain 10-12 feet apart for the duration of the class.
  5. Checkout at the welcome desk will be discontinued.
  6. Mats, foam rollers, and similar pieces of individual equipment will be moved into storage.
  7. Outdoor Recreation will rent equipment in the following manner:
     i. Equipment available by reservation.
     ii. Patrons are asked to arrive at their rental time to the back entrance of the SRWC (OAC entrance).
     iii. Equipment is disinfected after each use.
     iv. Limited equipment available (kayaks, bikes, rollerblades, lawn games, hammocks).
B. Face Covering Requirements
  1. Always required by all users of cardio and weight equipment.
C. Physical Distancing Parameters
   1. Physical distancing must be maintained while participating in cardio and strength training.
   2. Staff and student instructors will help monitor physical distancing during instruction.

D. Hygiene
   1. Participants should clean equipment with provided disinfectant wipes before and after using each machine.
   2. Signs encouraging proper hand washing and cleaning of equipment are located throughout the facility.

E. Disinfection
   1. Disinfectant wipes will be available for participants to clean equipment before and after each use.
   2. Staff/student staff will clean the facility at a higher rate than usual to support proper disinfection.
   3. The Clorox 360 will be used daily after close to disinfect the entire facility, including all equipment.
   4. Outdoor Recreation will clean equipment in the following manner: Rags and Oxivir will be used to clean all hard surfaces. Hammocks will be washed in the laundry after each use.

IV. Procedure Modifications: Very High Alert
   1. Facility will be closed until alert level reaches high.

V. Procedure Modifications: High Alert
   1. Cardio and weight equipment will remain in a layout that allows for 10 – 12 feet between each user/machine.

VI. Procedure Modifications: Low Alert
   1. Most normal operations resume. Equipment is moved out of the 3-court gym and other spaces so that those spaces can come back online. Group Exercise classes will return to the studios. Welcome desk checkout and shared use items will become available for use.
